B.Eng. Electrical Engineering
Air Force Institute of Technology (AFIT),
Kaduna — in progress

2022 – 2023

Backend Web Development
SACS Computers — Certificate (PHP &
Laravel)

LANGUAGES

English Fluent
Igala Native
Yoruba Conversational

Ojoh Peters Ojochegbe

FULL-STACK DEVELOPER · WEB2 & WEB3 · AI & AUTOMATION · DFIR

PROFILE

Resourceful, self-taught full-stack developer with 5+ years building modern web applications, multi-tenant SaaS, blockchain systems and AI-integrated tools. I specialize in rapid MVP delivery and scalable product architecture across Laravel, Django, Flask, Next.js and Vue, with growing Rust expertise for Web2 and Web3. Backed by a foundation in networking, electronics and digital forensics, I thrive in fast-moving, startup-style teams turning ideas into secure, shipped products.

EXPERIENCE

Full-Stack Developer · Efiko Solutions (Contract)

2025 – Present

- Built **CoachPro**, a multi-tenant coaching practice-management platform (Laravel 13, Vue 3 + Inertia, Tailwind) — firms, roles, engagements, sessions, goals and a branded client portal.
- Built **Sales Pro**, a mobile-first sales pipeline SaaS with 8-level reporting hierarchies, Kanban deal board, mandatory next-action enforcement and a downstream CRM handoff pipeline.
- Delivered modules for **Efiko HRIS** — performance appraisal, L&D planning, grievance, mentoring, exit management and employee self-service.

Web3 Developer · EcoCoin

2024 – 2025

- Developed a Solana-based token with airdrop and gamification features.
- Integrated Phantom wallet, IPFS file hosting and on-chain smart-contract logic.
- Deployed frontend and Rust backend utilities to a production VPS.

Full-Stack Developer · Crowdsourcing Emergency

2024 – 2025

- Built the MVP of a real-time emergency-response platform (Next.js + Laravel + PostgreSQL).
- Implemented backend APIs, a live report dashboard and end-to-end user flows; hosted on Render + Vercel.

Full-Stack Developer · BlogScribe (AI WordPress Bot)

2023 – 2024

- Created a Django app that generates and auto-publishes AI blog content to WordPress via REST.
- Integrated the OpenAI API with Markdown preview and a real-time publishing endpoint.

SELECTED PROJECTS

- Public Records NG** — central hub for Nigeria's public records (Laravel + React).
- NDNB** — verified national biographies platform with editorial workflow.
- Farmers Marketplace** — final-year e-commerce app (Next.js + MongoDB).
- ServiceMan** — three-sided service marketplace with Paystack & negotiation.
- Gift Card Shop** — Django REST + Next.js marketplace with referrals.
- The Green Seal** — executive activity-tracking system for IHS-BiRD&L.
- Job Matcher** — AI-powered job-matching platform (Django REST + Next.js).
- RoadRescue** — real-time roadside-assistance app (React + Firebase + Gemini).
