SKILLS

Languages

PHP TypeScript JavaScript
Python Dart SQL Rust

Frameworks

Laravel 12/13 Vue 3 · Inertia
Next.js · React CodeIgniter 4
Django · FastAPI Flutter
Tailwind CSS

Cloud & DevOps

GitHub Actions Docker Linux
cPanel / WHM Cloudflare
Vercel Fly.io Render
Backups & DR

Data & Realtime

MySQL PostgreSQL · RLS
Redis MongoDB Firebase
Laravel Reverb Web Push

AI & Integrations

Claude API
OpenAI · Azure OpenAI
Stripe Connect Paystack
WhatsApp Cloud API
Microsoft Graph

Security

App hardening Incident response
DFIR Networking

EDUCATION

2025 – PRESENT

B.Eng. Electrical Engineering
Air Force Institute of Technology
(AFIT), Kaduna

2022 – 2023

Backend Web Development
SACS Computers — Certificate (PHP &
Laravel)

English Fluent
Igala Native
Yoruba Conversational

Ojoh Peters Ojochegbe

Senior Software & Cloud Solutions Engineer

Multi-tenant SaaS · Cloud deployment & operations · AI integration · Security

PROFILE

Senior engineer with 5+ years building web platforms, multi-tenant SaaS and AI-integrated products. At Efiko Management Consulting I lead engineering on the company's B2B product portfolio — taking products from client specifications to production, largely as sole developer, and owning how they are deployed, monitored, backed up and secured. Comfortable across the whole stack: Laravel/Vue and Next.js on the web, Flutter on mobile, and the CI/CD, hosting and security work underneath.

EXPERIENCE

Senior Software & Cloud Solutions Engineer

Aug 2026 – Present

Efiko Management Consulting · Nigeria & USA · Lead engineer on the product portfolio

- Built the company's **Pro suite of B2B SaaS products** end-to-end from SRS documents and client meetings — mostly as sole developer, on Laravel 13, Vue 3 / TypeScript (Inertia) and Tailwind.
- Built **Efiko Daily** on web (Laravel 12, Reverb WebSockets, Web Push, Paystack) and as a **native Flutter app** for iOS and Android on a dedicated mobile API.
- Lead developer on the **Efiko HRIS** suite (CodeIgniter 4) — performance, L&D, payroll/PAYE, succession, grievance and 10+ other modules; built the Nigeria and USA corporate websites and the EfikoHub app launcher.
- Cloud & operations:** production deployments on cPanel/WHM behind Cloudflare, GitHub Actions CI (PHP 8.4/8.5 matrix, static analysis), realtime and push infrastructure (Reverb, Web Push, Firebase), encrypted off-server backups with retention and DR documentation, and a server-wide domain inventory tool.
- Security:** hardening and incident response across company platforms — access-control and API-token fixes, CSRF, MFA/passkeys and tamper-evident audit logs.
- Shipped **AI features on the Claude API**: qualitative-feedback synthesis and an agent that drafts daily headline summaries for human approval.

Efiko Daily

Team accountability SaaS + Flutter app: rollover engine, live stand-ups, reports, subscriptions.

SalesPro

Multi-tenant pipeline: 8-level hierarchies, Kanban, forecasting, mandatory next action · 115 tests.

TrainerPro

Trainer practice management: QR attendance, Zoom/Teams import, certificates, Kirkpatrick L3.

FeedbackPro

Anonymous workshop feedback with scoring, branded reports and Claude-powered synthesis.

CoachPro

Coaching practice platform: engagements, sessions, goals, invoicing, client portal, passkeys.

RiskPro · WorkFlow Pro

Operational-risk RCSA with KRI API and audit trail; no-code approval workflows with SLAs.

Freelance Full-Stack Engineer · Independent

2023 – Present

- Rebuilders Path Systems (US)** — Laravel 13 public site and staff platform: MFA, CRM, deadline engine and workflows; documents in SharePoint via Microsoft Graph, an Azure OpenAI document assistant and Stripe billing.
- Housing for Humanity International** — 40+ page NGO website on Next.js 16, delivered to the client's architecture with documented handover.
- Auctor Stack** — agent-native AI backend: FastAPI, Postgres Row-Level Security, BYOK model gateway, grounded retrieval, SDKs, CLI and MCP server on Fly.io.
- FlexBill** — WhatsApp-first B2B billing on Next.js 16 and Prisma with Stripe Connect direct charges and signed-webhook verification.
- EcoCoin** (2024 – 2025) — Solana SPL token with airdrop, gamification and Phantom wallet.

SELECTED EARLIER PROJECTS

Public Records NG — hub for Nigeria's public records (Laravel + React).

NDNB — verified national biographies with editorial workflow.

The Green Seal — executive activity tracking for IHS-BiRD&L.

ServiceMan — three-sided service marketplace with Paystack.

Crowdsourcing Emergency — real-time emergency reporting (Next.js + Laravel).

BlogScribe — AI writer auto-publishing to WordPress (Django + OpenAI).
